Attendance of Research Seminars

During the Master's program, attendance of two research seminars is mandatory.

It is possible to attend the same seminar during two semesters or to attend two different seminars during one semester.

Choose a seminar that is relevant for your specialisation or one of the general seminars (seminar in physics without bachelor or master defences, Schroedinger Colloquium). You may also mix the seminars but should attend 10 talks per semester.

For each talk you attend get the signature of the host, the speaker or your supervisor for the attendance list .

Once you have attended 20 talks, fill the form Research Seminar in the Masters's Program and hand it in to studium@physik.uzh.ch.
